**ARCHI  
SENSE**

enhances buildings  
with a new type of beauty

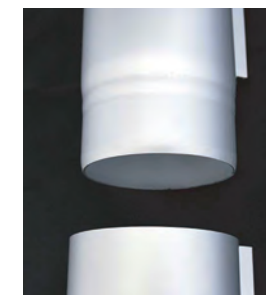

Efficient and Beautiful Design

## Aluminum gutters, drainpipes

### Features of "ARCHI SENSE", the system for aluminum drainpipes and gutters.

■ High Workability.

No processing is  
needed for joint-parts.

■ High Maintainability.

Easy to clean pipes.

■ Beautiful Design.

Made it beautiful  
by hiding metal fittings.

No heavy protecting  
pipes are necessary.

Stain-resistant.

ARCHI SENSE

enhances buildings with a new type of beauty

# "ARCHI SENSE", the system for aluminum drainpipes and gutters.

## Integrated Extrusion Molding.

Ordinal drainpipes, made of zinc, are a roll-pipe with joints, but Aluminum drainpipes, named "Alu-drainpipes", and aluminum gutters, named "Alu-gutters", are made of integrated extruded molded aluminum.

## Resistant to Dents.

Ordinal zinc drainpipes have pipe thickness from 0.6 to 0.7mm, but "Alu-drainpipes" and "Alu-gutters" have pipe thickness of 1.5mm or more in order to gain enough strength.
